

Star Words	Definition
Habitats	A habitat is the natural place in which something lives. A habitat provides living things with everything they need to survive.
Microhabitats	A microhabitat is a very small habitat that minibeasts live in.
Alive	Animals and plants are living things. Living things need to have their basic needs met to survive.
Dead	If something used to be alive (or was once alive), it means it used to be living but isn't anymore. Now, it is dead
Never alive	Things made out of metal, glass, plastic or rock were never living because they did not move by themselves, grow or need food.

Basic Needs

All living things need

shelter	food	air	water
