Understanding of the World

The Natural World - Seasons

Star Words	Definition
Seasons	A time of year with its own kind of weather. There are four seasons.
Seasonal change	How the world becomes different during each season.
Weather	What the air outside is like each day. The air affects our lives and what we wear.
Weather forecast	A prediction of what the weather will be like in an hour, tomorrow or next week.
Temperature	How hot or cold something is.

Helpful Books

Home Learning Ideas

- Go on a walk and collect seasonal items you find such as conkers or acorns.
- Use the things you find to make a picture

The four seasons are called, Spring, Summer, Autumn and Winter. During each season the world around us changes, we notice this particularly when watching the Trees grow.

In Spring, it starts to get warmer and there are more hours of daylight. Plants start to grow and baby animals are born.

In the Summer, the weather can get warmer and we need t sure we can stay safe. We must drink lots of water, wear sun hats and use sun cream. We must also try not to be in the sun for too long.

Autumn starts in September and ends in November. It gets colder and the days feel shorter because there is less sunlight.

In Winter it gets colder and the hours of daylight get shorter. It might rain or snow more. I must wear clothes to help keep me warm such as a coat, hat, scarf and gloves.
